

Handmade Envelopes

Make your own envelopes from catalogs, calendars, magazine pages or maps

- Print the black and white template on the following page on 11x8.5 inch paper or cardboard at 100%
- As printers usually don't print to the edge of the page, extend the lines by drawing them in by hand
- Cut out the template and glue to cardboard if printed on paper
- Place template on the image you want to use for the envelope and cut out
- Turn the cut out envelope image face side down
- Fold the 2 side flaps toward the center and crease
- Fold the bottom back flap up and crease
- Fold the top back flap down toward the bottom back flap and crease
- Put glue on the left and right side on the inside of the bottom back flap and fold up over the side flaps to make the envelope pocket
